The Sign Depot Inc. Creates Fabulous Signs in Kitchener, Ontario: Canada

The Sign Depot Inc. in Kitchener, ON does terrific work, particularly with the carved, dimensional and sandblasted signs that they create. One of the things that seems to set their work apart, is the DEPTH of their work.

Many sign companies that create carved and dimensional signs, tend to keep the thickness and/or depth of their carving within the bounds of the standard size of the material they are using. Meaning, that while some of the carving may be terrific, the "magic" happens all within a few inches.

The Sign Depot is willing to push well beyond this 2" boundary as a standard operating principle, and their work is terrific because of it. Their carvings add weight and depth to their signs because of their non-conservative approach, and any objects they feature on their signs rush out from the background and seduce your eyes with shadow and color.
